THROTTLE POSITION SENSOR

EXAMINER'S COMMENT

After considering the Applicant's arguments provided in the amendment dated April 22, 2005, a restriction requirement was deemed proper as follows:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-27, drawn to a method or apparatus for determining a contact resistance between a wiper and a resistive strip in a throttle position sensor, classified in class 73, subclass 118.2.

- II. Claims 28 and 29, drawn to a throttle position sensor having a circuit which determines a resistance between the resistive strip ends, classified in class 73, subclass 118.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as determining the resistance between the resistive strip ends without the need for determining the contact resistance between the wiper and the resistive strip. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Invention II, restriction for examination purposes as indicated is proper.

During a telephone conversation with the Applicant's Representative, Douglas W. Sprinkle, on May 24, 2005 a provisional election was made with traverse to prosecute Invention I, claims 1-27. Affirmation of this election must be made by the Applicant in replying to this Office action. Claims 28 and 29 are withdrawn from further consideration by the Examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

The Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

EXAMINER'S AMENDMENT

An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to the Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this Examiner's amendment was given in a telephone interview with the Applicant's Representative, Douglas W. Sprinkle, on May 24, 2005.

The application has been amended as follows:

CLAIMS

Claim 23, -line 8; after the phrase "across the resistor," delete the word "and"
-line 9; change the phrase "and the strip." to --and the strip, and--
-after the last line of the claim add the line --determining the contact
resistance between the wiper and the strip.--

Cancel claims 28 and 29.
